

Clou Xtra

Clou Xtra

The Clou Xtra combines proven heat storage technology with exceptional design. Xtra technology guarantees you more hours of heat storage without the need for refilling. This unique material absorbs the heat of the fire and then releases it over time.

Heat Capacity	15 sq
Peak Efficiency	66%
Emissions	1.1 grams/kg
Max. log length	300mm
Average Peak Power	10.7 kw

Key Features

- ✓ Austrian engineering
- ✓ Patented "Xtra" heat storage system
- ✓ Large firebox with round glass door
- ✓ Design statement

120 x 45S

120 x 45S

The S120 is an architectural masterpiece and perfect for those who want their fire to be the centrepiece of a room. Clever convection cladding means the heat trapped in the cavity can be circulated either back into the same room or other rooms. Like all Austroflamm fires the large firebox uses the Keramott firebrick so the light interior reflects the flames creating a greater glow.

Heat Capacity	20 - 25 sq
Peak Efficiency	see manual
Emissions	see manual
Max. log length	500mm
Average Peak Power	see manual

Key Features

- ✓ Large 1200mm door for exceptional viewing
- ✓ Convection cladding system for greater heat transfer
- ✓ Huge firebox
- ✓ Stainless steel glide handle

Dexter

Dexter

The Dexter is designed for those who want to create their own bespoke fire system to compliment any interior design. Available as a left or right option, the fire can be raised or modules added to the top, side or bottom as wood storage, shelf or bench.

Heat Capacity	12 - 15 sq
Peak Efficiency	65%
Emissions	1.5 grams/kg
Max. log length	400mm
Average Peak Power	9.9 kw

Key Features

- ✓ Left or right door opening
- ✓ Clever modular system to personalise stove
- ✓ Rear flue option
- ✓ Superior air wash system

Woody

Woody

The Woody has the unique Keramott firebrick which is a special product developed exclusively by Austroflamm. This material excels by creating an exceptional ratio between thermal insulation and heat conduction. As a consequence the combustion chamber reaches higher temperatures sooner. A clean, low-emission combustion, keeping the glass exceptionally clean and the firebricks white.

Heat Capacity	10 - 12 sq
Peak Efficiency	69%
Emissions	1.0 grams/kg
Max. log length	200mm
Average Peak Power	7 kw

Key Features

- ✓ Genuine cool touch Beech and Walnut handle
- ✓ Patented Keramott firebox lining
- ✓ Optional log storage base
- ✓ Outside Air Kit with Adaptor for Passiv Haus install
