MADE IN PORTUGAL

Clare 100S B

Clare 100S B Freestanding

Bold and modern, the ADF Clare 100S B combines sleek design with powerful performance. Crafted in Portugal, this freestanding wood fire delivers efficient, clean-burning heat and a wide view of the flames. With its smooth steel finish and minimalist form, it's a striking addition to contemporary living spaces.

Optional bench or pedestal to suit your style.

Heat Capacity	150 - 200 m²
Maximum Efficiency	74%
Emissions	0.6 g/kg
Flue Dimension	Ø180mm
Material	5mm steel welded firebox, with a high-density thermal lining

Key Features

- ✓ Advanced combustion technology and firebox design for clean burning
- ✓ Automatic Flue Damper reduces smoke ingress into the room
- ✓ Robust Construction - carbon steel and stainless steel
- ✓ Styling options - black steel plateau bench or pedestal

Clare 80S Q

Clare 80S Q Freestanding

With widescreen views and clean, efficient performance, the Clare 80S Q brings both warmth and wow factor to your home. Designed for optimum combustion and ease of use, this freestanding fire blends striking modern design with reliable functionality - creating a captivating focal point for any living space.

Heat Capacity	up to 200 m²
Maximum Efficiency	68%
Emissions	0.7 g/kg
Flue Dimension	Ø203mm
Material	5mm steel welded firebox, with a high-density thermal lining

Key Features

- ✓ 15.0kW heat output for powerful, consistent warmth
- ✓ Concealed door handle ensures a clean, seamless look
- ✓ Optional fully sealed outside air kit enhances efficiency and performance
- ✓ Styling options - pedestal or black steel plateau bench (pictured)

Clare 80S P

Clare 80S P Freestanding

With its elegant pedestal base and widescreen glass door, the Clare 80S P delivers a bold design statement alongside efficient performance. Providing up to 11.2kW of heat with 73% efficiency, this contemporary wood fire is both a striking focal point and a reliable source of warmth for modern living spaces.

Heat Capacity	150 - 180 m ²
Maximum Efficiency	73%
Emissions	0.7 g/kg
Flue Dimension	Ø180mm
Material	5mm steel welded firebox, with a high-density thermal lining

Key Features

- ✓ 10 year firebox warranty
- ✓ Concealed door handle
- ✓ Anti-condensation system
- ✓ Hidden tangential fan (optional) maximises efficiency and heat distribution
- ✓ Styling options - black steel plateau bench, log stand or pedestal (pictured)

Clare 80S B

Clare 80S B Freestanding

A perfect balance of style, efficiency, and performance, the Clare 80S B offers clean-burning heat with a sleek, practical design. With impressive fuel efficiency that meets the latest Australian standards, it's an eco-conscious choice for modern living - bringing both comfort and refined European styling to your home.

Heat Capacity	150 - 180 m ²
Maximum Efficiency	73%
Emissions	0.7 g/kg
Flue Dimension	Ø180mm
Material	5mm steel welded firebox, with a high-density thermal lining

Key Features

- ✓ High density thermal vermiculite liners insulate the chamber, and adds additional heat reflection
- ✓ State-of-the-art combustion technology for a cleaner burn with less emissions
- ✓ Concealed door opening
- ✓ Styling options - black steel plateau bench, pedestal or log stand (pictured)

Clare 60Vt B

Clare 60Vt B Freestanding

With its striking vertical format and expansive glass door, the Clare 60Vt B makes a bold design statement while maximising your view of the flames. It combines sleek, modern styling with efficient, clean-burning performance. Choose from a range of optional bases to customise the look and complement your living space.

Heat Capacity	150 - 180 m ²
Maximum Efficiency	75%
Emissions	0.8 g/kg
Flue Dimension	Ø152mm
Material	5mm steel welded firebox, with a high-density thermal lining

Key Features

- ✓ Vertical design with large glass window
- ✓ Automatic Flue Damper reduces smoke ingress into the room
- ✓ Single Combustion Control
- ✓ High density vermiculite lining and ash drawer
- ✓ Styling options - black steel plateau bench (pictured) or log stand

Clare 100S Insert

Clare 100S Insert

Blending exceptional craftsmanship with advanced heating technology, the Clare 100S Insert offers powerful, clean-burning performance that meets the strictest environmental standards. With its widescreen flame view and refined design, it brings lasting warmth, comfort, and a sense of indulgence to any space.

Heat Capacity	150 - 200 m ²
Maximum Efficiency	74%
Emissions	0.6 g/kg
Flue Dimension	Ø180mm
Material	5mm steel welded firebox, with a high-density thermal lining

Key Features

- ✓ The convection system and tangential fan (optional) ensures an even, quiet heat distribution
- ✓ State-of-the-art combustion technology for a cleaner burn with less emissions
- ✓ Levelling screws ensures a safe and stable installation
- ✓ Zero Clearance Box (optional) or Masonry installation

Clare 80S Insert

Clare 80S Insert

Experience efficient, sustainable heating with the Clare 80S Insert. Its striking flame display transforms from a roaring blaze to a gentle glow, adapting to your mood and comfort. With sleek design and precise engineering, this high-performance fireplace delivers both ambience and functionality in one beautifully integrated package.

Heat Capacity	150 - 180 m ²
Maximum Efficiency	73%
Emissions	0.7 g/kg
Flue Dimension	Ø180mm
Material	5mm steel welded firebox, with a high-density thermal lining

Key Features

- ✓ Black screen-printed glass conceals the frame for a sleek, seamless look
- ✓ Smart air control with single-slider operation for easy, efficient combustion
- ✓ Vermiculite firebox lining for improved efficiency
- ✓ Zero Clearance Box (optional) or Masonry installation

Clare 60Vt Insert

Clare 60Vt Insert

With it's fusion of cutting-edge technology and contemporary design, the Clare 60Vt offers powerful, efficient heating in a sleek freestanding form. Features like an automatic flue damper and convenient ash drawer enhance everyday usability, while its clean lines and widescreen flame view make it a standout feature in any living space.

Heat Capacity	150 - 180 m ²
Maximum Efficiency	75%
Emissions	0.8 g/kg
Flue Dimension	Ø152mm
Material	5mm steel welded firebox, with a high-density thermal lining

Key Features

- ✓ Independently tested to exceed Australian Standards, with ultra low emissions
- ✓ Outside, bottom, or rear air intake (direct combustion system)
- ✓ Dynamic air control system for an efficient, clean burn
- ✓ A carbon-neutral and sustainable heat source
